OBJECTIVE:

I am a dynamic, resourceful, highly qualified professional with a genuine interest in children's cognitive and social growth. I am actively involved in all areas of education including administration, parental involvement, curriculum development, student career preparation, and community service. I intertwine a strong passion for the importance of education with experience, professionalism, and a desire to be a lifetime learner. It is my belief that all children can learn; it simply takes a motivated, patient, experienced individual to tap into each child's potential and cognitive ability. I am a self-driven team player that communicates effectively and fosters positive, professional relationships.
